Saturday and Sunday and Holidays

WHAT TO DO: IF YOUR CAR CRASHES INTO A UTILITY POLE

Accidents happen. Would you know what to do if your car crashed into an electric utility pole? Knowing what to do could be the difference between life and death.

Always consider power lines and other electrical equipment to be live and dangerous!

IF A POWER LINE FALLS ON YOUR VEHICLE AND THERE IS NO FIRE:

Your safest option is to stay inside your vehicle until help arrives. The vehicle acts as a path for the electrical current to travel to reach the ground. You are safe inside the vehicle, but if you get out, you could be electrocuted.

Call 911 or your local electric utility for help.

IF A POWER LINE FALLS ON YOUR VEHICLE AND THERE IS A FIRE:

Only attempt to leave your vehicle if it is on fire.

To exit safely:

- Jump out of the vehicle, making sure NO part of your body or clothing touches the ground and vehicle at the same time.
- Land with both feet together and in small, shuffling steps, move at least 40 ft. away from the vehicle.
- The ground could be energized. Shuffling away with both feet together decreases the risk of electrical shock.

Call 911 or your local electric utility for help.

A family consisting of a man, a woman, and two young boys are walking a large white dog down a wooden staircase in a forest. The man is leading the dog on a leash, and the woman is walking behind him. The two boys are also walking down the stairs. The dog is a large, fluffy white breed, possibly a Samoyed. The forest is filled with trees and bushes with yellow and orange autumn leaves. A wooden railing is visible on the right side of the staircase. The text "November 2023" is overlaid in the top right corner.

Energy Efficiency Tip

Blocked air vents force your heating system to work harder than necessary and increase pressure in your ductwork, which can cause cracks and leaks to form.

Make sure all air vents are unobstructed from furniture, drapes or other items to ensure sufficient circulation throughout your home. If necessary, purchase a vent extender, which can be placed over a vent to redirect air flow from underneath furniture.
